

## Special Issue

# Knowledge Engineering for International Standardization

### Message from the Guest Editors

The aim of standardization is to provide ways of specifying (requirements) and structuring given domains. Problems faced by SB (IEC, ISO, ITU) become major as the complexity of standards increase. Some TCs or SCs have set up WG for their terminology. It can be difficult to use standards across domains, in spite of some harmonization work, as for smart cities, IoT, smart grids, Industry 4.0, digital twin and smart manufacturing since they are often at the junction of separate disciplines. For this, an interdisciplinary approach can be beneficial. It is also important to consider work done by consortia (OPC, AAS, AutomationML, ECLASS, ..), widely used by industry, to check their consistency with existing standards. Semantic approaches, ontologies, KE/KR techniques are powerful tools to help write standards. However, they are rarely known to technical experts. On the other hand, specialists in KE are often far away from the world of standards. This Special Issue is designed to study the application of KR techniques to standardization, from a theoretical and practical point of view, and the benefits that can be expected: are smart standards still a dream or can they become reality?

### Guest Editors

Prof. Dr. Anne-Françoise Cutting-Decelle

Scientific Collaborator (CUI), Université de Genève, Site de Battelle, 7, Route de Drize, Carouge, CH-1227 Geneva, Switzerland

Dr. Patrick Lamboley

Senior Director, Standardization & Interoperability Lab, Schneider Electric, 35 Rue Joseph Monier, 92500 Rueil-Malmaison, France

### Deadline for manuscript submissions

## About the Journal

### Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

*Information* is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

---

### Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /  
CiteScore - Q2 (Information Systems)
