

Special Issue

New Frontiers in Android Malware Analysis and Detection

Message from the Guest Editor

Android is the most popular operating system for mobile phones, with more than 2.5 billion currently active devices. Its popularity drove the attention of cybercriminals and malware creators, who have been releasing new and increasingly sophisticated malware that exploits the characteristics of Android applications to steal users' information, encrypt their data, or compromise their devices. The goal of this Special Issue is to propose new, sophisticated techniques to analyze and mitigate malware that targets the Android platform. These techniques may feature, among others, the use of static and dynamic analysis, the adoption of machine learning, taint analysis, symbolic execution, and so forth. This Special Issue also welcomes papers that focus on the analysis of specific malware families (such as ransomware), as well as papers related to obfuscation analysis and adversarial machine learning.

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q2 (Information Systems)
