

Special Issue

Techniques and Frameworks to Detect and Mitigate Insider Attacks

Message from the Guest Editors

This Special Issue on “Techniques and Frameworks to Detect and Mitigate Insider Attacks” aims to explore the state-of-the-art research dealing with new surveys, policies, tools, techniques, concepts, and applications concerning the detection, response and recovery, mitigation, and prevention of insider attacks. Topics of interest include, but are not limited to:

- Insider attack modeling and attack vectors;
- Implications of insider attacks;
- Policies and regulations to prevent insider attacks;
- Authentication and authorization techniques to address insider attacks;
- Behavioral analytics and fraud detection;
- Data governance and differential privacy to mitigate data leaks;
- Insider attack recovery mechanisms;
- Insider attack datasets;
- Applications of machine learning to detect and prevent insider

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q2 (Information Systems)
