Special Issue

Digital Citizenship and Participation 2018

Message from the Guest Editors

The dissemination of information and deliberation among citizens are essential for democracy, therefore social and political participation through new media and information technology has become a mainstream activity among those with media access in many of the developed states. The digital platforms for participation that nurture the growth of digital citizenship may also be an important factor that is shaping our ideas about government as we are observing various outcomes of digital activities. This issue hopes to not only investigate the state of digital citizenship, but also examine the dynamics of the digital platforms that are contributing to participation in various areas and why this is setting new trends for various types of citizen engagement.

- Digital Citizenry
- Engagement
- Media Access
- E-democracy
- Inclusion

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo
School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:
JCR - Q2 (Computer Science, Information Systems) / CiteScore - Q2 (Information Systems)
