# Special Issue

# Information Spreading on Networks

## Message from the Guest Editors

The Special Issue" Information Spreading on Networks"
has been OPEN! This Special Issue seeks contributions
reporting on recent advancements concerning
information spread in the context of humanities and
computer science. This includes novel techniques to
classify information, as well as the discussion of the
impact of information dissemination in several fields.
Topics of interest include but are not limited to:

- Technologies for information spread;
- Technologies for detecting misinformation;
- Model information spread and game theory
- Information spread on dynamic networks
- Information spread on social networks;
- Intelligent systems for information modeling;
- Rumor spread on networks;
- Fake news data: collection and classification;
- Fake news spread and detection;
- Information spread and trust;
- ML and deep learning for information spread and classification;
- Epidemic system model;
- Information spread and recommendation systems;
- Real case study and application of information spread.

## Guest Editors

**Prof. Dr. Vincenza Carchiolo**

# About the Journal

### Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

*Information* is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

### Editor-in-Chief

Prof. Dr. Willy Susilo
School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

### Author Benefits

**Open Access:**
free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:**
indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

**Journal Rank:**
JCR - Q2 (Computer Science, Information Systems) / CiteScore - Q2 (Information Systems)
