

Special Issue

Internet of Everything and Vehicular Networks

Message from the Guest Editors

The Internet of Everything is based on the idea of comprehensive connectivity, intelligence, and cognition between people, processes, data, and things, with the goal of converting information into actions for new intelligent capabilities and improved experiences. As one significant aspect of the Internet of Everything, vehicular networks provide network services in intelligent transportation systems, enabling a variety of applications for safety, traffic efficiency, driver assistance, and infotainment. This Special Issue aims to assemble scholars to exchange and share their experiences and research results on the most recent innovations, trends, and concerns, as well as practical challenges encountered and solutions adopted in the fields of the Internet of Everything and vehicular networks. The topics of this Special Issue include, but are not limited to, the following:

- Technologies and standards;
- Architectures, protocols, and algorithms;
- Security, privacy, and trust;
- Data management and analytics;
- Theory, modeling, and simulation;
- Network performance and management;
- Prototypes, testbeds, and case studies;
- Services and applications.

Guest Editors

Prof. Dr. Vasco N. G. J. Soares
Dr. João M. L. P. Caldeira
Dr. Jaime Galán-Jiménez

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q2 (Information Systems)
