### Message from the Guest Editors

Dear Colleagues,

Safe and efficient civil infrastructure forms the basis of our communities and economies. We seek sustainable, smart and accessible solutions to provide reliability of services.

Agencies in charge of maintaining and managing civil infrastructure across the globe are always faced with budgetary and resource constraints. There is a need for designing and constructing long-lasting infrastructure as well as cost-effective and reliable health monitoring systems to ensure that these infrastructure systems do perform optimally the functions they are intended to perform during their service lives. Rapid and significant advancements are being made in the development and implementation of smart technologies and IoT in the context of Smart Cities initiatives, including data acquisition, sensing, energy harvesting, wireless communications, big data, machine learning, etc. We welcome papers that address a broad range of topics focusing on intelligent and multi-functional civil infrastructure.

## Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

**Journal Rank:** JCR - Q2 (Engineering, Civil) / CiteScore - Q1 (Building and Construction)
