Message from the Guest Editor

Dear Colleagues,

Road infrastructure is a crucial component in the economic growth of every country, which requires holistic and well-developed planning from the perspective of various disciplines. An efficient road should address the requirements of various road users and be forgiving to its users. A road has different components, and many engineering disciplines are involved in the planning and design of a road system, from geometry, pavement, and structure to traffic and hydraulics. This Special Issue aims to gather works from practitioners involved in road infrastructure design, management, and construction.

Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank: JCR - Q2 (Construction and Building Technology) / CiteScore - Q1 (Building and Construction)
