Stellenbosch University,  
Stellenbosch 7600, South Africa

Deadline for manuscript  
submissions:

**closed (30 November 2021)**

### Message from the Guest Editors

The principal objectives of this Special Issue are:

- To collect the knowledge on the recent developments in various types of cementitious materials that have superior corrosion resistance to equivalent steel-reinforced mortar and concrete under mechanical and chemical loads.
- To embrace the different durability measurement techniques such as new testing methods and modelling that have been developed by researchers.

This Special Issue aims to collect relevant research papers or reviews reporting significant progress in the assessment and comprehension of concrete corrosion and degradation phenomena, in the presence of constant and variable loads.

Topics of interest are related to the properties and resistance of cementitious composites in aggressive environments, based on:

- Chloride- and carbonation-induced corrosion of rebars;
- Corrosion inhibitors;
- Cracking;
- Alkali-silica reaction;
- Freezing and thawing;
- Chemical attack;
- Concrete degradation modelling;
- Corrosion of fiber-reinforced cementitious materials;

## Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

**Journal Rank:** JCR - Q2 (Construction and Building Technology) / CiteScore - Q1 (Building and Construction)
