Message from the Guest Editors

Dear Colleagues,

Green infrastructure that can be used for stormwater runoff management includes rain gardens, bioretention swale and trees, green roofs, etc. The design of such systems is versatile and can be modified to meet the needs of the area of interest. This Special Issue focuses on novel ideas and technologies relating to green infrastructure for sustainable storm water management, with an emphasis on water quality enhancement and quantity control. Any other related topics are also welcome.

We look forward to your contributions to this Special Issue and your help in promoting/facilitating green infrastructure planning, development and implementation.

Dr. Jiangyong Hu

Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

Author Benefits

Open Access:—free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: Indexed by Inspec (IET) and other databases, Scopus (2019 CiteScore: 1.3)

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 11.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2020).
