Deadline for manuscript submissions:

15 September 2021

Message from the Guest Editors

In this Special Issue, we solicit high-quality original research articles focused on how complex infrastructure geotechnics problems are being solved with the contribution of advanced artificial intelligent algorithms, whether in design or construction, covering the different infrastructure types (e.g., roads, railways, bridges, tunnels, water supply, sewers, electrical grids, telecommunications).

Topics of interest include but are not limited to:

- Tunnels and deep excavations;
- Asset management;
- New construction materials and mixture design;
- Intelligent constructions;
- Materials behavior (rock, soil, cementitious mixtures);
- Site characterization;
- Soil improvement;
- Monitoring, surveillance, and field measurement methods;
- Virtual reality and augmented reality;
- Advanced design techniques.

Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Inspec, and many other databases.

Journal Rank: CiteScore - Q2 (*Building and Construction*)
