

Special Issue

Green Infrastructures

Message from the Guest Editor

This Special Issue aims to explore the multifaceted benefits of green infrastructure and its role in providing ecosystem services. We invite contributions that examine the design, implementation, and assessment of GI initiatives across various scales and contexts. Topics of interest include, but are not limited to, the following: **Assessment of ecosystem services provided by GI:** Studies quantifying the benefits of GI, such as improved air quality, enhanced biodiversity, and increased recreational spaces. **The design and planning of GI:** Research focusing on innovative approaches to integrating GI into urban and rural planning, considering factors such as spatial configuration and connectivity. **Implementation and management strategies:** Analyses of best practices for the successful implementation and maintenance of GI projects, including community engagement and policy considerations. **Case studies and practical applications:** Documentation of real-world examples where GI has been effectively employed to address environmental challenges and provide ecosystem services.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

Editor-in-Chief

Dr. Pedro Arias-Sánchez

Applied Geotechnologies Group, Department of Natural Resources and Environmental Engineering, School of Mining Engineering, University of Vigo, 36310 Vigo, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q2 (Construction and Building Technology) /
CiteScore - Q1 (Building and Construction)
