

Special Issue

Sustainable and Resilient Infrastructure: Climate Adaptation through Green Engineering and Low-Carbon Technologies

Message from the Guest Editors

We are excited to announce the upcoming Special Issue. This Special Issue invites contributions from researchers and practitioners dedicated to enhancing the sustainability and resilience of infrastructure in the face of climate change. We are particularly interested in manuscripts that address the integration of green engineering principles and low-carbon technologies into the planning, design, construction, and operation of infrastructure projects. Topics of interest include, but are not limited to, disaster risk reduction and management, energy-efficient transportation systems, carbon footprint reduction strategies, renewable energy utilization, and smart city technologies. This issue aims to provide a comprehensive platform for exchanging ideas, methodologies, and practical solutions to help pave the way toward a more sustainable and climate-resilient future. Contributors are encouraged to present case studies, theoretical models, and empirical research that demonstrate how multidisciplinary approaches can be effectively employed to achieve these goals.

Guest Editors

Dr. Yangyang Li

Department of Civil Engineering, Monash University, Melbourne, Australia

Dr. Zhuo Chen

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published.

Infrastructures is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

Editor-in-Chief

Dr. Pedro Arias-Sánchez

Applied Geotechnologies Group, Department of Natural Resources and Environmental Engineering, School of Mining Engineering, University of Vigo, 36310 Vigo, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q2 (Construction and Building Technology) /
CiteScore - Q1 (Building and Construction)
