

Special Issue

A Compendium of the Latest Developments in Operational Modal Analysis of Civil Engineering Structures with Applications

Message from the Guest Editors

The 10th International Operational Modal Analysis Conference (IOMAC 2024) represents a forum for the exchange of ideas, knowledge sharing, and technology-need matchmaking in the global OMA community. The theme of the IOMAC 2024 Conference, “Augmented OMA”, reflects the fact that the well-established OMA applicative perspectives and performance can be augmented by applying advanced AI technologies, modeling and optimization tools, as well as innovative data processing approaches. These enlarge the classical domain of OMA towards the development of SHM technologies, digital twins, and innovative assessment procedures. Moreover, new sensing technologies as well as improvements in existing ones provide a significant impulse to the applications. The above considerations confirm that there is a tremendous opportunity to explore new applications of these technologies. This volume aims to collect selected high-quality papers presented at the 10th International Operational Modal Analysis Conference. For more details about the conference, please visit: <https://iomac2024.com>.

Guest Editors

Dr. Carlo Rainieri

National Research Council of Italy, Construction Technologies Institute, Corso Nicolangelo Protopisani 70, 80146 Naples, Italy

Prof. Dr. Carmelo Gentile

Department of Architecture, Built Environment and Construction Engineering (ABC), Politecnico di Milano, Piazza Leonardo da Vinci 32, 20133 Milan, Italy

Deadline for manuscript submissions

closed (30 November 2024)

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

Editor-in-Chief

Dr. Pedro Arias-Sánchez

Applied Geotechnologies Group, Department of Natural Resources and Environmental Engineering, School of Mining Engineering, University of Vigo, 36310 Vigo, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q2 (Construction and Building Technology) /
CiteScore - Q1 (Building and Construction)
