

# Special Issue

## Durability and Degradability of Construction Materials

### Message from the Guest Editor

The present Special Issue of *Infrastructures* intends to highlight the areas of research related to the degradation of construction materials, factors that influence degradation and consequences for serviceability and durability. The following themes may be addressed:

- Degradation mechanisms of construction materials and systems: assessment, measurement, causes, experimental evaluation, numerical modeling and simulation.
- Assessment of serviceability taking into account degradation conditions; the assessment may concern structural behavior, hygrothermal performance, aesthetic issues, or other relevant aspects of construction.
- Durability evaluation: experimental methods; mathematical models; in situ analysis and monitoring.
- Effects of maintenance on durability.
- Influence of compatibility of different materials on the durability of construction systems.
- Weathering and climatic changes: how the evolution of climatic changes may impact durability of construction materials and prevention measures.
- Impacts of degradation in construction sustainability and in the health of users.

### Guest Editor

Dr. Maria do Rosário Veiga

National Laboratory for Civil Engineering (LNEC), Avenida do Brasil  
101,1700-066 Lisboa, Portugal

### Deadline for manuscript submissions

closed (30 November 2021)

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published.

*Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

---

### Editor-in-Chief

Dr. Pedro Arias-Sánchez

Applied Geotechnologies Group, Department of Natural Resources and Environmental Engineering, School of Mining Engineering, University of Vigo, 36310 Vigo, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Construction and Building Technology) /  
CiteScore - Q1 (Building and Construction)
