

Special Issue

Planning Peripheral and Ultra-Peripheral Infrastructures

Message from the Guest Editors

It is a fact that the peripheral and ultra-peripheral regions as Borderlands or Islands present several territorial specificities. Nevertheless, these territories also present several obstacles, barriers, and opportunities. Among all those issues, appropriate infrastructure planning is necessary to answer the local populations' needs. Therefore, studies regarding transportation and infrastructure planning and sustainability assessment in those territories are fundamental to achieving sustained growth. The present Special Issue (SI) expects to cross and analyze the dynamics and challenges ongoing in those peripheral territories regarding transportation and infrastructure planning and sustainability and with the related issues that may impact it. The editors encourage the submission of studies associated with the topics of transportation and infrastructure planning in peripheral and ultra-peripheral regions, as well as with the associated governance strategies and methods, regional planning.

Guest Editors

Dr. Rui Alexandre Castanho

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published.

Infrastructures is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

Editor-in-Chief

Dr. Pedro Arias-Sánchez

Applied Geotechnologies Group, Department of Natural Resources and Environmental Engineering, School of Mining Engineering, University of Vigo, 36310 Vigo, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q2 (Construction and Building Technology) /
CiteScore - Q1 (Building and Construction)
