

# Special Issue

## Advances in Railway Electrification

### Message from the Guest Editors

The scope of this special issue is to provide an overview of the technological challenges in the development of efficient electric trains, implementing new power systems and innovative infrastructure to support the development of solutions to meet net zero emission targets. This Special Issue aims to explore the design of innovative infrastructure for the cost effective electrification of railway lines, conventional and innovative testing procedures for components of infrastructure, the structural performance of conventional and innovative materials for railway application, the design of innovative locomotives for zero/low-carbon emission, the design and testing of energy storage devices and their structural assessment under service conditions, innovative solution to reduce emission of diesel engines for heavy duty applications, advanced powertrains for mobility and power generation applications, and advanced battery management systems.

### Guest Editors

**Dr. Marzio Grasso**

Advanced Vehicle Engineering Centre, Cranfield University, Cranfield MK43 0AL, UK

**Prof. Dr. Mark Robinson**

Future Mobility Group, School of Engineering, Cassie Building, Newcastle University, Newcastle upon Tyne NE1 7RU, UK

### Deadline for manuscript submissions

closed (30 September 2021)

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Construction and Building Technology) /  
CiteScore - Q1 (Building and Construction)
