Emerging Technologies for Effective and Intelligent Transport Infrastructure Monitoring

Message from the Guest Editors

Nowadays, in order to contribute to surveys and make them more effective, various kinds of smart infrastructure monitoring systems are available; these are generally based on innovative sensors, systems and integrated technologies, and allow us to gather and collect all the data useful for monitoring and analyzing the real state of each infrastructure component. The use of these systems is quickly developing among managers, technicians, researchers, and road authorities, especially with the aim of continuously controlling the decay of infrastructure elements and identifying the most suitable time to activate preventive or curative maintenance actions. In addition, new technologies may also make it possible to significantly reduce traffic disruptions and risks to the public, optimizing the use of resources, minimizing operating costs and enabling the life cycle of assets to be extended.

Guest Editors

Dr. Giuseppe Cantisani

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

Editor-in-Chief

Dr. Pedro Arias-Sánchez

Applied Geotechnologies Group, Department of Natural Resources and Environmental Engineering, School of Mining Engineering, University of Vigo, 36310 Vigo, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q2 (Construction and Building Technology) /
CiteScore - Q1 (Building and Construction)
