

Special Issue

Road Systems and Engineering

Message from the Guest Editor

Road infrastructure is a crucial component in the economic growth of every country, which requires holistic and well-developed planning from the perspective of various disciplines. An efficient road should address the requirements of various road users and be forgiving to its users. A road has different components, and many engineering disciplines are involved in the planning and design of a road system, from geometry, pavement, and structure to traffic and hydraulics. This Special Issue aims to gather works from practitioners involved in road infrastructure design, management, and construction.

Guest Editor

Dr. Mahdi Keramatikerman

Engineering & Technology Branch, Queensland's Department of Transport and Main Roads, Brisbane, QLD, Australia

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published.

Infrastructures is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

Editor-in-Chief

Dr. Pedro Arias-Sánchez

Applied Geotechnologies Group, Department of Natural Resources and Environmental Engineering, School of Mining Engineering, University of Vigo, 36310 Vigo, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q2 (Construction and Building Technology) /
CiteScore - Q1 (Building and Construction)
