

## Special Issue

# Fiber Reinforced Polymer-Ultra High Performance Concrete (FRP-UHPC): Design, Performance, and Application

### Message from the Guest Editors

Researchers and practitioners increasingly prioritize UHPC due to its unparalleled capacity to enhance structural performance, extend infrastructure service life, and reduce lifecycle costs. The integration of fiber-reinforced polymer (FRP) with UHPC has emerged as a prominent research focus owing to synergistic performance enhancements. Potential topics include, but are not limited to, the following:

- FRP minibar-reinforced UHPC;
- Marine applications of FRP-UHPC;
- Structural design of FRP bar-reinforced UHPC members;
- FRP-UHPC system performance under extreme environments;
- Data-driven design methodologies for FRP-UHPC system;
- Applications of FRP-UHPC system in repair/strengthening;
- Case studies.

Original research papers and review articles are welcome. Submission to this Special Issue is open to all interested parties. We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Construction and Building Technology) /  
CiteScore - Q1 (Building and Construction)
