Special Issue

Green Infrastructure for Sustainable Stormwater Management

Message from the Guest Editors

Green infrastructure that can be used for stormwater runoff management includes rain gardens, bioretention swale and trees, green roofs, etc. The design of such systems is versatile and can be modified to meet the needs of the area of interest. This Special Issue focuses on novel ideas and technologies relating to green infrastructure for sustainable storm water management, with an emphasis on water quality enhancement and quantity control. Any other related topics are also welcome. We look forward to your contributions to this Special Issue and your help in promoting/facilitating green infrastructure planning, development and implementation.
