

## Special Issue

# Resilience of Infrastructures to Natural Hazards

### Message from the Guest Editor

Resilience has become a relevant concept for decision-making procedures such as post-hazard event mitigations and recovery investments, providing readable findings for a wide range of stakeholders, such as infrastructure owners, transportation authorities and public administrators. The holistic dimension of the concept allows to integrate multidisciplinary perspectives and develop strategies to enhance the functionality of strategic systems and preserve community economies and human lives. In particular, infrastructures are fundamental systems on which our societies are built up and particularly exposed to natural hazards. Therefore, the assessment of their resilience is a significant issue for stakeholders from multiple disciplines that may be interested in discussing the state of the art on scientific applications, sharing present and future perspectives.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published.

*Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Construction and Building Technology) /  
CiteScore - Q1 (Building and Construction)
