

Special Issue

Resilient Infrastructure Systems

Message from the Guest Editors

This Special Issue focuses on “Resilient Infrastructure Systems” from an interdisciplinary perspective, particularly focusing on the technological and social aspects of infrastructure systems. The objective of this issue is to continue building a resilient infrastructure knowledge community that spans sectoral, organizational, and disciplinary boundaries. The Special Issue aims at publishing high-quality papers, particularly those that integrate both the physical and technological aspects of infrastructure systems with the human dimensions of these systems, including the institutions that govern infrastructure and community resilience. In addition to external submissions through MDPI, this issue will contain selected papers submitted to the *Resilient Infrastructure Systems* theme of the 2018 International Symposium of Sustainable Systems and Technology (ISSST) to be held in Buffalo, NY in June 2018. Papers will be reviewed by international experts and then widely disseminated by the journal.

Guest Editors

Dr. Thomas P. Seager

Dr. Susan Spierre Clark

Dr. Jennifer L. Schneider

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published.

Infrastructures is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

Editor-in-Chief

Dr. Pedro Arias-Sánchez

Applied Geotechnologies Group, Department of Natural Resources and Environmental Engineering, School of Mining Engineering, University of Vigo, 36310 Vigo, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q2 (Construction and Building Technology) /
CiteScore - Q1 (Building and Construction)
