

## Special Issue

# Structural Performances of Bridges

### Message from the Guest Editor

The various versions of the latest transportation legislations require including national performance reporting in network management in order to secure a proper performance. Transportation bridge investments need to achieve performance targets that make progress toward the national goals of safety, structural condition, and system reliability. While the legislation outlines a performance-based investment approach, it does not provide specific instructions. To comply with the legislation requirements, practical implementation of performance in bridge network management is in need of further research. It is essential to advance a comparative approach with a concurrent focus on individual bridge systems as well as the network and subset levels. Additionally, current practices need further development of the interactions within recording and reporting strategies, operational diagnostic methodologies, quantitative evaluation measures, and more. This Special Issue intends to offer an important contribution in support of discussion and direction of new concepts in the structural performances of bridges.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published.

*Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Construction and Building Technology) /  
CiteScore - Q1 (Building and Construction)
