

Special Issue

Feature Papers in Organometallic Chemistry 2024

Message from the Guest Editors

Our Special Issue "10th Anniversary of *Inorganics*: Organometallic Chemistry" in 2023 has been a great success (you can reference this SI [here](https://www.mdpi.com/journal/inorganics/special_issues/VOX110E984): https://www.mdpi.com/journal/inorganics/special_issues/VOX110E984). As we feel that there is far more potential in this topic, and we have received some further agreements for manuscript submissions, we want to launch the Special Issue "Feature Papers in Organometallic Chemistry 2024" as a follow-up SI project. We invite all colleagues working in the field of organometallic chemistry to submit a contribution within this SI to shed light on this important aspect of chemistry. Communications, full research papers, and reviews describing the synthesis of organometallic compounds, their use or relevance in catalysis, and their application in important fields such as luminescent materials, photochemical energy conversion, and biomedical applications in diagnosis and treatment, just to name a few, are welcome.

Guest Editors

Prof. Dr. Axel Klein
Prof. Dr. Francis Verpoort
Dr. Shuang Xiao

About the Journal

Message from the Editor-in-Chief

Inorganic chemistry remains a lynchpin of modern chemistry, not only embracing the function and reactivity of combinations of most elements of the periodic table, but also providing a footing for studies of materials, catalysts, drugs, fuels and industrial chemicals. Arguably, the role and reach of inorganics in society have never been as great as today. Adventurous research at the heart and at the extremes of inorganic chemistry is vital to further advances and Inorganics offers authors the opportunity to publish exciting new research in an open access format.

Editor-in-Chief

Prof. Dr. Duncan H. Gregory

School of Chemistry, University of Glasgow, University Avenue, Glasgow G12 8QQ, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Inorganic and Nuclear) / CiteScore - Q2 (Inorganic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
