

# Special Issue

## Recent Advances in Ceramic Materials

### Message from the Guest Editor

I am pleased to invite you to submit manuscripts to a Special Issue dedicated to recent advances in ceramics as a special part of the inorganic material science: "Advances in Ceramic Materials". Suitable topics for original research articles, critical reviews and short communications include, but are not limited to: materials in the different (also multi-component) systems consisting of oxides and/or non-oxide components; phase and microstructure transformations in the production way from fine synthetic powders, different colloid systems or melts to ceramics with unique target properties such as density, porosity, strength, high or low temperature durability, heat and electrical flow conductivity or resistance, transparency, catalytic activity, radiation and chemical resistance, etc.

### Guest Editor

Dr. Tatiana Safronova

Department of Chemistry, Lomonosov Moscow State University, Building, 3, Leninskie Gory, 1, 119991 Moscow, Russia

### Deadline for manuscript submissions

closed (31 December 2023)

## About the Journal

### Message from the Editor-in-Chief

Inorganic chemistry remains a lynchpin of modern chemistry, not only embracing the function and reactivity of combinations of most elements of the periodic table, but also providing a footing for studies of materials, catalysts, drugs, fuels and industrial chemicals. Arguably, the role and reach of inorganics in society have never been as great as today. Adventurous research at the heart and at the extremes of inorganic chemistry is vital to further advances and Inorganics offers authors the opportunity to publish exciting new research in an open access format.

---

### Editor-in-Chief

Prof. Dr. Duncan H. Gregory

School of Chemistry, University of Glasgow, University Avenue, Glasgow G12 8QQ, UK

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Chemistry, Inorganic and Nuclear) / CiteScore - Q2 (Inorganic Chemistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
