

## Special Issue

# Insects Ecological, Physiological, and Genetic Adaptation to the Environment

### Message from the Guest Editor

Insects are ubiquitous. They live both on and in lands, waters, air and even other living beings—including other insects. They thus show a tremendous spectrum of adaptations to all possible habitats. Furthermore, some have to cope with significant and even extreme changes in living conditions (temperature, humidity, population size, etc.). Behind such adaptations are DNA, gene expression, physiological, developmental, morphological and behavioural changes, which improve the insect's chances of survival and reproduction. This Special Issue aims to gather original research articles as well as minireviews on molecular and non-molecular aspects relating to cases of insect adaptations to the environment.

### Guest Editor

Prof. Dr. Mohammed Bakkali

Departamento de Genética, Facultad de Ciencias, Universidad de Granada, 18071 Granada, Spain

### Deadline for manuscript submissions

closed (30 July 2023)

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Brian T. Forschler

Department of Entomology, University of Georgia, 413 Biological  
Sciences Building, Athens, GA 30602-2603, USA

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,  
PMC, PubAg, and other databases.

##### Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 18.1 days after  
submission; acceptance to publication is undertaken in 2.9  
days (median values for papers published in this journal in  
the first half of 2025).
