

Special Issue

Forensic Entomology: Ecophysiology

Message from the Guest Editors

The relationship between environmental factors and the biology of necrophorous insects is at the core of the use of these insects in a forensic context. Although temperature is the most obvious factor, other aspects of the abiotic environment, particularly relative humidity, can play an important role. Similarly, biotic factors are important in attraction, acceptance, and use of dead tissue by necrophorous insects. Therefore, we are pleased to invite submissions of research and review articles in this area to this Special Issue of *Insects*

Guest Editors

Prof. Dr. Leon G. Higley

School of Natural Resources, University of Nebraska, Lincoln, NE

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Brian T. Forschler

Department of Entomology, University of Georgia, 413 Biological
Sciences Building, Athens, GA 30602-2603, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,
PMC, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 18.1 days after
submission; acceptance to publication is undertaken in 2.9
days (median values for papers published in this journal in
the first half of 2025).
