

## Special Issue

# Arthropod Trophic Associations in Natural, Urban, Agricultural, Aquatic and Forest Ecosystems: Destabilizing Agents

### Message from the Guest Editors

The trophic associations of arthropods (Insecta and Arachnida) constitute a complex natural system. However, they can be destabilized by biotic and abiotic factors. The impacts of destabilizers such as pesticides, climate change, water and air pollution, fertilizers, environmental degradation, industrial waste, pharmaceutical products, and changes in biodiversity on arthropods are yet to be discovered. Therefore, we are pleased to invite submissions of research and review articles to this Special Issue of *Insects*. Papers that consider the effects of the above factors on beneficial arthropods (e.g., predators, parasitoids, pollinators, etc.) are welcome.

### Guest Editors

Dr. Erifili P. Nika

Laboratory of Agricultural Zoology and Entomology, Department of Crop Science, Agricultural University of Athens, 75 Iera Odos Str., 11855 Athens, Greece

Dr. Nickolas G. Kavallieratos

Laboratory of Agricultural Zoology and Entomology, Department of Crop Science, Agricultural University of Athens, 75 Iera Odos Str., 11855 Attica, Greece

### Deadline for manuscript submissions

closed (31 December 2023)

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Brian T. Forschler  
Department of Entomology, University of Georgia, 413 Biological  
Sciences Building, Athens, GA 30602-2603, USA

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,  
PMC, PubAg, and other databases.

##### Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 18.1 days after  
submission; acceptance to publication is undertaken in 2.9  
days (median values for papers published in this journal in  
the first half of 2025).
