

Special Issue

Endocrinology and Endocrine Disruption in Insects

Message from the Guest Editors

The endocrine system controls many processes in insects such as development, physiology, and behavior. Furthermore, environmental factors, pollutants, or biocontrol solutions can also affect the endocrinology of these organisms. Whether these effects are useful or deleterious, endocrine disruption can take place and have a strong effect on insects. The objective of this Special Issue is, thus, to publish new data or reviews on the endocrinology of insects, the role of hormones in various biological contexts, and the factors or molecules likely to induce disturbances in the endocrine system.

Guest Editors

Dr. David Siaussat

UMR 7618 Institute of Ecology and Environmental Sciences of Paris,
Department of Sensory Ecology, Sorbonne University, 4 Place Jussieu,
Tour 44-45, 3ème étage, 75005 Paris, France

Dr. Marlène Goubault

Institut de Recherche sur la Biologie de l'Insecte, Tours, France

Dr. Charlotte Lécureuil

Université de Tours, Tours, France

Deadline for manuscript submissions

closed (31 January 2023)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Brian T. Forschler

Department of Entomology, University of Georgia, 413 Biological
Sciences Building, Athens, GA 30602-2603, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,
PMC, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 18.1 days after
submission; acceptance to publication is undertaken in 2.9
days (median values for papers published in this journal in
the first half of 2025).
