

## Special Issue

# Mosquito: Ecology, Behavior and Molecular Biology

### Message from the Guest Editor

Mosquitoes (Diptera: Culicidae) are best known for their role as vectors of numerous parasites and pathogens. In addition to their medical and veterinary importance, the mosquito's semiaquatic life cycle, rapid development and high abundance and distribution abilities make them interesting target species for studies in general ecology as well as physiological studies. This Special Issue aims to cover recent studies in mosquito research. We will accept both original research papers and literature reviews regarding mosquito behavior, life history, molecular biology control techniques etc. Preference will be given to studies combining field and laboratory data. We look forward to receiving your submissions.

### Guest Editor

Dr. Alon Silberbush

Department of Biology and the Environment, University of Haifa, Haifa, Israel

### Deadline for manuscript submissions

closed (31 August 2023)

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Brian T. Forschler

Department of Entomology, University of Georgia, 413 Biological  
Sciences Building, Athens, GA 30602-2603, USA

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,  
PMC, PubAg, and other databases.

##### Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 18.1 days after  
submission; acceptance to publication is undertaken in 2.9  
days (median values for papers published in this journal in  
the first half of 2025).
