

Special Issue

Mosquito: Ecology, Behavior and Molecular Biology

Message from the Guest Editor

Mosquitoes (Diptera: Culicidae) are best known for their role as vectors of numerous parasites and pathogens. In addition to their medical and veterinary importance, the mosquito's semiaquatic life cycle, rapid development and high abundance and distribution abilities make them interesting target species for studies in general ecology as well as physiological studies. This Special Issue aims to cover recent studies in mosquito research. We will accept both original research papers and literature reviews regarding mosquito behavior, life history, molecular biology control techniques etc. Preference will be given to studies combining field and laboratory data. We look forward to receiving your submissions.

Guest Editor

Dr. Alon Silberbush

About the Journal

Message from the Editor-in-Chief

Arthropods are a diverse and abundant group of animals that are important to a variety of research dictates. For example, hexapods act as bio-indicators of ecosystem function and pest status and serve as model systems for questions concerning physiology, embryology, genetics, and social interaction. The editorial board and staff at *Insects* is committed to providing contributors an open access forum to showcase objective and innovative research as well as succinct review articles. Our journal is dedicated to providing timely and thorough review of qualified submissions and we welcome you to submit a contribution.

Editor-in-Chief

Prof. Dr. Brian T. Forschler

Department of Entomology, University of Georgia, 413 Biological Sciences Building, Athens, GA 30602-2603, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, GEOBASE, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
