

## Special Issue

# Managing Invasive Insects: Good Intentions, Hard Realities

### Message from the Guest Editor

Invasive insect herbivores tend to have populations that are more abundant and damaging in the area that they successfully invade. Once established in the new area, invasive insect herbivores exert strong negative impacts on urban landscapes, agroecosystems, and native habitats, which often have negative economic and environmental outcomes. Key issues related to managing invasive insects include knowledge gaps regarding the development of risk assessments for species before and after they arrive in a new area, proactive management solutions, early detection and rapid response programs, frugality and pragmatism, and the need for industry and consumer cooperation and education.

This Special Issue brings together a diverse group of key experts, addressing some of these important questions related to invasive insect species ecology and control. Submissions could be reviews, short communications, concept papers, or original research articles that present new data and analyses.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Brian T. Forschler  
Department of Entomology, University of Georgia, 413 Biological  
Sciences Building, Athens, GA 30602-2603, USA

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,  
PMC, PubAg, and other databases.

##### Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 18.1 days after  
submission; acceptance to publication is undertaken in 2.9  
days (median values for papers published in this journal in  
the first half of 2025).
