Resilient Tree Nut Agroecosystems under Changing Climate

Message from the Guest Editors

Although the production of tree nuts such as macadamia nuts, almond, chestnuts, cashew nuts, hazelnuts, and Queensland nuts is increasing globally, several invasive and native pests of these nuts are currently threatening their production, and changing climate is exacerbating their dispersal and damage. Therefore, appropriate environmentally friendly and sustainable management responses such as predictive models of their future ecological suitable niches, biocontrol strategies, encompassing classical, augmentation, and conservation biocontrol and other IPM approaches, including semiochemical-dependent control approaches such as push-pull and the use of kairomones, are essential for managing these pests. This Special Issue invites researchers to submit original and review articles on any aspects of the ecology and management options for the tree nut pests.

About the Journal

Message from the Editor-in-Chief

Arthropods are a diverse and abundant group of animals that are important to a variety of research dictates. For example, hexapods act as bio-indicators of ecosystem function and pest status and serve as model systems for questions concerning physiology, embryology, genetics, and social interaction. The editorial board and staff at *Insects* is committed to providing contributors an open access forum to showcase objective and innovative research as well as succinct review articles. Our journal is dedicated to providing timely and thorough review of qualified submissions and we welcome you to submit a contribution.

Editor-in-Chief

Prof. Dr. Brian T. Forschler

Department of Entomology, University of Georgia, 413 Biological Sciences Building, Athens, GA 30602-2603, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, GEOBASE, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
