

Special Issue

Insects and Their Derivatives for Human Practical Uses 2nd Edition

Message from the Guest Editors

Insect culture has some environmental advantages compared to other forms of animal production; as such, insects are currently considered part of the circular economy. Nevertheless, the use of insects has not yet been widely adopted by humans. Insects have been proposed as a source of protein and valuable fatty acids, and chitin has been described as a probiotic and as suitable for use in recyclable containers. Insects are also useful in medical therapies. This Special Issue of *Insects* aims to present multidisciplinary approaches to the use of insects and their derivatives for human purposes, such as for nutritional, medical and legal purposes, in rearing systems, for food safety, and as environmental markers. Considering the success of our previous Special Issue "[Insects and Their Derivatives for Human Practical Uses](#)", we are pleased to launch [Insects and Their Derivatives for Human Practical Uses \(Volume II\)](#). Both original submissions and reviews will be considered for publication.

About the Journal

Message from the Editor-in-Chief

Arthropods are a diverse and abundant group of animals that are important to a variety of research dictates. For example, hexapods act as bio-indicators of ecosystem function and pest status and serve as model systems for questions concerning physiology, embryology, genetics, and social interaction. The editorial board and staff at *Insects* is committed to providing contributors an open access forum to showcase objective and innovative research as well as succinct review articles. Our journal is dedicated to providing timely and thorough review of qualified submissions and we welcome you to submit a contribution.

Editor-in-Chief

Prof. Dr. Brian T. Forschler

Department of Entomology, University of Georgia, 413 Biological Sciences Building, Athens, GA 30602-2603, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, GEOBASE, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
