

Special Issue

Systematics, Ecology and Evolution of Lepidoptera

Message from the Guest Editors

Lepidoptera are one of the largest groups of insects. In recent years, the system of these insects has significantly changed. Hundreds of new species are described every year, from all parts of the world, even from Europe. Many species of Lepidoptera are important pests, others (such as the silkworm) are used in the economy, and still others are rare species that adorn our fauna. A Special Issue of the *Insects* journal will be dedicated to the order Lepidoptera. The main topics: taxonomy of little-studied families of Lepidoptera, molecular genetic features, trophic relationships, study of faunas of hot spots of biodiversity, issues of evolution and ecology of the group. We will also welcome review and original articles on the conservation of rare and endangered Lepidoptera. Manuscripts must contain original, previously unpublished data.

Guest Editors

Dr. Roman Viktorovich Yakovlev

Dr. Nazar A. Shapoval

Dr. Anatoly Krupitsky

Deadline for manuscript submissions

closed (27 October 2023)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Brian T. Forschler
Department of Entomology, University of Georgia, 413 Biological
Sciences Building, Athens, GA 30602-2603, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,
PMC, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 18.1 days after
submission; acceptance to publication is undertaken in 2.9
days (median values for papers published in this journal in
the first half of 2025).
