# Advance in Biology and Management of Termites—In Memory of Professor Yoshimura

## Message from the Collection Editors

Alongside their vital ecological roles, termites cause serious damage to wood and wood products worldwide. Termite management is one of the most important research topics in urban entomology. In this Special Issue, we would like to invite papers concerning different aspects of termite biology and management. Studies on termite behavior, ecology and physiology are welcomed, as well as new ideas and innovative technological trials from around the world focusing on future termite management. Contributions in the form of mini-reviews and short technical reports are also encouraged.

### **Author Benefits**

# **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, and other databases.

## **Journal Rank:**

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

## **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
