

## Special Issue

# Biology and Management of Bed Bugs

### Message from the Guest Editors

Bed bugs, *Cimex lectularius* and *Cimex hemipterus*, have reestablished themselves as key urban and community pests throughout the world after decades of relative obscurity. Bed bug infestations are expected to increase in the coming years, presenting many challenges to the pest control industry and to the research community. This Special Issue will report recent discoveries in the field of bed bug biology as well as the utilization of this knowledge to develop new solutions and management of bed bugs.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Brian T. Forschler  
Department of Entomology, University of Georgia, 413 Biological  
Sciences Building, Athens, GA 30602-2603, USA

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,  
PMC, PubAg, and other databases.

##### Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.7 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the second half of 2024).
