Recent Advances in Black Soldier Fly Research

Message from the Guest Editor

The black soldier fly (BSF), *Hermetia illucens* L., has drawn increasing attention for its promising potential of waste nutrition recycling to produce novel alternative protein, lipids, chitin resources, and other bioproducts, which is very beneficial to the sustainable development of society and economy. It is becoming one important star insect for both scientific research and industrial application. A Special Issue will be organized by the journal *Insects* to present the latest research progress on BSF. This Special Issue will cover all aspects of BSF-related research, including but not limited to the biology, microbiology, conversion technology, environmental effects, product development, and applications. We cordially invite you to submit a review or original research paper to this Special Issue.

About the Journal

Message from the Editor-in-Chief

Arthropods are a diverse and abundant group of animals that are important to a variety of research dictates. For example, hexapods act as bio-indicators of ecosystem function and pest status and serve as model systems for questions concerning physiology, embryology, genetics, and social interaction. The editorial board and staff at *Insects* is committed to providing contributors an open access forum to showcase objective and innovative research as well as succinct review articles. Our journal is dedicated to providing timely and thorough review of qualified submissions and we welcome you to submit a contribution.

Editor-in-Chief

Prof. Dr. Brian T. Forschler

Department of Entomology, University of Georgia, 413 Biological Sciences Building, Athens, GA 30602-2603, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, GEOBASE, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
