

Special Issue

Development of Botanical Insecticides and Their Application

Message from the Guest Editors

Botanical insecticides continue to gain acceptance in pest management, both in highly-industrialized food production and for smallholder farmer crop protection. There are also emerging opportunities for botanicals in vector control, veterinary pest management and structural pest management. This Special Issue will focus on recent progress on the development and global utilization of botanicals, while identifying key challenges to the success of these products. Prof. Dr. Murray B. Isman
Prof. Dr. Phil C. Stevenson

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,
PMC, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 18.1 days after
submission; acceptance to publication is undertaken in 2.9
days (median values for papers published in this journal in
the first half of 2025).
