

Special Issue

Ecology and Management of Forest Insects in a Changing World

Message from the Guest Editors

Climate change, disturbance events, invasive species, and patterns of land use are among key drivers that interact to impact the distribution, abundance, and evolution of forest insects in a changing world. This Special Issue of *Insects* will broadly address the effects of global change on ecology and management of insects along a gradient of wilderness, managed, plantation, and urban forests. We invite submissions, including reviews and primary research reports, that address effects and implications of environmental change on insects in forest ecosystems including community and population ecology, biodiversity and conservation, biological invasions, ecosystem services, and pest management.

Guest Editors

Dr. Daniel A. Herms

The Davey Tree Expert Company, Kent, OH, USA

Dr. Kenneth F. Raffa

Professor Dept. of Entomology & Beers-Bascom Professor of Conservation Biology, University of Wisconsin-Madison, 345 Russell Laboratories, Madison, WI 53706, USA

Dr. Kayla I. Perry

About the Journal

Message from the Editor-in-Chief

Arthropods are a diverse and abundant group of animals that are important to a variety of research dictates. For example, hexapods act as bio-indicators of ecosystem function and pest status and serve as model systems for questions concerning physiology, embryology, genetics, and social interaction. The editorial board and staff at *Insects* is committed to providing contributors an open access forum to showcase objective and innovative research as well as succinct review articles. Our journal is dedicated to providing timely and thorough review of qualified submissions and we welcome you to submit a contribution.

Editor-in-Chief

Prof. Dr. Brian T. Forschler

Department of Entomology, University of Georgia, 413 Biological Sciences Building, Athens, GA 30602-2603, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, GEOBASE, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
