# Special Issue

# Honeybee Neurobiology and Behavior

### Message from the Guest Editors

Insects are model systems in research on the neural basis of behavior and animal cognition. Processes underlying sensory perception, learning, memory and high-order integration have been studied most successfully in insects. Among them, Hymenoptera have been most intensively used to unravel the mechanistic basis of cognitive processes. This special issue will report recent discoveries and review key subject areas in the field of insect neuroscience.

### Guest Editors

Prof. Dr. Randolf Menzel
Prof. Dr. Martin Giurfa
Dr. Jean-Christophe Sandoz

### Deadline for manuscript submissions

closed (1 September 2019)

# About the Journal

## Message from the Editor-in-Chief

## Editor-in-Chief

Prof. Dr. Brian T. Forschler
Department of Entomology, University of Georgia, 413 Biological Sciences Building, Athens, GA 30602-2603, USA

## Author Benefits

**High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, and other databases.

**Journal Rank:**

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

**Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
