

Special Issue

Improving Invasive Insect Species Management

Message from the Guest Editors

Dear Colleagues, Invasive insects pose serious risks to the production and quality of food, fibers, and horticultural crops around the globe. Growers spend a considerable amount of money combating invasive insects. Researchers are engaged in studying various biological and ecological aspects of invasive insects, such as lifecycle, phenology, dispersal, behavior, and abiotic responses, to develop effective and sustainable management strategies. This Special Issue will report recent, innovative tools and reviews on specific subject areas related to improving management of invasive insects affecting agricultural and ornamental commodities.

About the Journal

Message from the Editor-in-Chief

Arthropods are a diverse and abundant group of animals that are important to a variety of research dictates. For example, hexapods act as bio-indicators of ecosystem function and pest status and serve as model systems for questions concerning physiology, embryology, genetics, and social interaction. The editorial board and staff at *Insects* is committed to providing contributors an open access forum to showcase objective and innovative research as well as succinct review articles. Our journal is dedicated to providing timely and thorough review of qualified submissions and we welcome you to submit a contribution.

Editor-in-Chief

Prof. Dr. Brian T. Forschler

Department of Entomology, University of Georgia, 413 Biological Sciences Building, Athens, GA 30602-2603, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, GEOBASE, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
