

# Special Issue

## Parasite-Insect Interactions

### Message from the Guest Editors

Insects have a major impact on all of our lives, from vectoring plant and animal diseases to eating or pollinating our crops. Good or bad, all insects are potentially at risk from parasites and diseases, be they parasitic wasps and flies, entomopathogenic worms, or microbial pathogens such as bacteria, viruses and fungi. This special issue will include original research articles and reviews by leading entomologists and associated experts. Articles will focus on the biology, ecology and evolution of the parasites and pathogens of beneficial and pest insects, and the molecular, physiological and genetic interactions between the two.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Brian T. Forschler

Department of Entomology, University of Georgia, 413 Biological  
Sciences Building, Athens, GA 30602-2603, USA

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,  
PMC, PubAg, and other databases.

##### Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 18.1 days after  
submission; acceptance to publication is undertaken in 2.9  
days (median values for papers published in this journal in  
the first half of 2025).
