

## Special Issue

# Pest Sustainable Management in Agriculture

### Message from the Guest Editor

Sustainable Management of Pests in Agriculture is a broad science that encompasses chemical, biological, cultural, and physical control options with a special focus on integrated pest management (IPM). IPM promotes the use of surveillance and monitoring of the target pest to guide the timing and use of chemical, biological and cultural control options in such a way that both pesticide use and any deleterious effects to non-target organisms are minimised. Studies that promote the use of microbial agents such as entomopathogenic fungi, bacteria or nematodes as well as cultural (e.g., sanitation) and physical control options (e.g., trapping) will be particularly sought after to include in this Special Issue.

### Guest Editor

Dr. David F. Cook

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Brian T. Forschler  
Department of Entomology, University of Georgia, 413 Biological  
Sciences Building, Athens, GA 30602-2603, USA

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,  
PMC, PubAg, and other databases.

##### Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 18.1 days after  
submission; acceptance to publication is undertaken in 2.9  
days (median values for papers published in this journal in  
the first half of 2025).
