

Special Issue

Pest Management of Termites

Message from the Guest Editors

This special issue welcomes relevant research articles and review papers that focus on and enhance our understanding of termite pest management. Researchers in this or related study areas are invited to submit manuscripts for this issue. More information about the journal and manuscript preparation guidelines can be found at https://www.mdpi.com/journal/insects/special_issues/pest_management_termites. This page contains a link with Instructions for Authors. The submission deadline is 31 January 2021. In case you cannot meet the deadline, please feel free to contact us and we can provide you a proper extension. **As guest editors, we have some discount and waiver slots.** Please contact us if submission would cause substantial financial strain on your budget.

About the Journal

Message from the Editor-in-Chief

Arthropods are a diverse and abundant group of animals that are important to a variety of research dictates. For example, hexapods act as bio-indicators of ecosystem function and pest status and serve as model systems for questions concerning physiology, embryology, genetics, and social interaction. The editorial board and staff at *Insects* is committed to providing contributors an open access forum to showcase objective and innovative research as well as succinct review articles. Our journal is dedicated to providing timely and thorough review of qualified submissions and we welcome you to submit a contribution.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, GEOBASE, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
