

Special Issue

Non-*Apis* Pollinators and Global Change

Message from the Guest Editors

We are soliciting manuscript submissions that address non-*Apis* pollinator responses to a changing world. Specifically, we will publish manuscripts that address insect responses to climate change, landscape change (e.g., habitat loss, urbanization, etc.), agricultural intensification, natural disasters, and management practices in forestry and agriculture. Responses to global change include changes in species distribution, diversity and conservation, synchrony with floral resource availability and natural enemy abundance, and sustainability of managed pollinator populations or wild pollinators for pollination of crops, etc.

About the Journal

Message from the Editor-in-Chief

Arthropods are a diverse and abundant group of animals that are important to a variety of research dictates. For example, hexapods act as bio-indicators of ecosystem function and pest status and serve as model systems for questions concerning physiology, embryology, genetics, and social interaction. The editorial board and staff at *Insects* is committed to providing contributors an open access forum to showcase objective and innovative research as well as succinct review articles. Our journal is dedicated to providing timely and thorough review of qualified submissions and we welcome you to submit a contribution.

Editor-in-Chief

Prof. Dr. Brian T. Forschler

Department of Entomology, University of Georgia, 413 Biological Sciences Building, Athens, GA 30602-2603, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, GEOBASE, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
