

Special Issue

Impact of Pollutants on Insects

Message from the Guest Editor

In ecotoxicology, the study of the impact of pollutants on organisms is crucial. Studies on insect models are more and more numerous and show the relevance of these models to understand the effects of pollution. This Special Issue therefore aims to publish new data or reviews on the impact of pollutants on insects on several levels of observation (from molecular to ecosystem). This issue will make it possible to deal with various themes such as hormones, cocktail effects, the impact of climate change, detoxification and resistance phenomena, or even the opportunity to use insects as an environmental diagnostic tool.

About the Journal

Message from the Editor-in-Chief

Arthropods are a diverse and abundant group of animals that are important to a variety of research dictates. For example, hexapods act as bio-indicators of ecosystem function and pest status and serve as model systems for questions concerning physiology, embryology, genetics, and social interaction. The editorial board and staff at *Insects* is committed to providing contributors an open access forum to showcase objective and innovative research as well as succinct review articles. Our journal is dedicated to providing timely and thorough review of qualified submissions and we welcome you to submit a contribution.

Editor-in-Chief

Prof. Dr. Brian T. Forschler

Department of Entomology, University of Georgia, 413 Biological Sciences Building, Athens, GA 30602-2603, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, GEOBASE, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
