

Topical Collection

Insect Sensory Biology

Message from the Collection Editors

Insects are highly successful organisms with sophisticated sensory equipment. Investigating their sensory biology is crucial in order to understand their rapid adaptation to a large variety of environments. Here we would like to illustrate how sensory systems deal with adaptations to specific natural or anthropogenic environments, and how these findings may help in ecosystem conservation or the control of insect pests. For this Topical Collection we invite contributions dealing with advances in insect sensory biology from molecular, anatomical, and physiological aspects up to behavioral, ecological, and evolutionary studies.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Brian T. Forschler
Department of Entomology, University of Georgia, 413 Biological
Sciences Building, Athens, GA 30602-2603, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,
PMC, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 18.1 days after
submission; acceptance to publication is undertaken in 2.9
days (median values for papers published in this journal in
the first half of 2025).
