

Special Issue

Stressors on Bee Health

Message from the Guest Editors

This special issue will focus on biotic and abiotic stressors that affect bee health. Topics such as how pesticides, food resources, parasites, pathogens, and changing habitat affect honey bee (*Apis* sp. and native bee (non-*Apis*) populations, how those colonies and populations respond to the stressors, and how stressors can interact are invited from across the globe. Authors are encouraged to submit relevant articles concerning both laboratory and field studies as well as modelling studies. Dr. John J. Adamczyk, Jr.

Dr. William Meikle

Please note that for papers submitted after 1 July 2018 an APC of 1000 CHF applies.

Guest Editors

Dr. John J. Adamczyk, Jr., PhD.

The Thad Cochran Southern Horticultural Laboratory, USDA-Agricultural Research Service, P.O. BOX 287, Poplarville, MS 39470, USA

Dr. William Meikle, PhD.

Carl Hayden Bee Research Center, USDA-ARS, Tucson, AZ 85719, USA

Deadline for manuscript submissions

closed (1 September 2018)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Brian T. Forschler
Department of Entomology, University of Georgia, 413 Biological
Sciences Building, Athens, GA 30602-2603, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,
PMC, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 18.1 days after
submission; acceptance to publication is undertaken in 2.9
days (median values for papers published in this journal in
the first half of 2025).
